

Talk With Your Doc

Telehealth Made Quick and Easy

Telehealth shouldn't just be a temporary solution during the COVID-19 crisis. It can be a new way to build long-term relationships that span from hands-on visits in-person to personalized virtual engagement online.

Talk With Your Doc allows you to serve current patients that need healthcare visits and are either unable or unwilling to come into the healthcare facility.

We know the landscape of medicine is ever-changing. That's why we built a flexible platform designed for EHR integration with our patient portal, MyCareCorner, to adapt quickly as your needs change.

Primary Use Cases

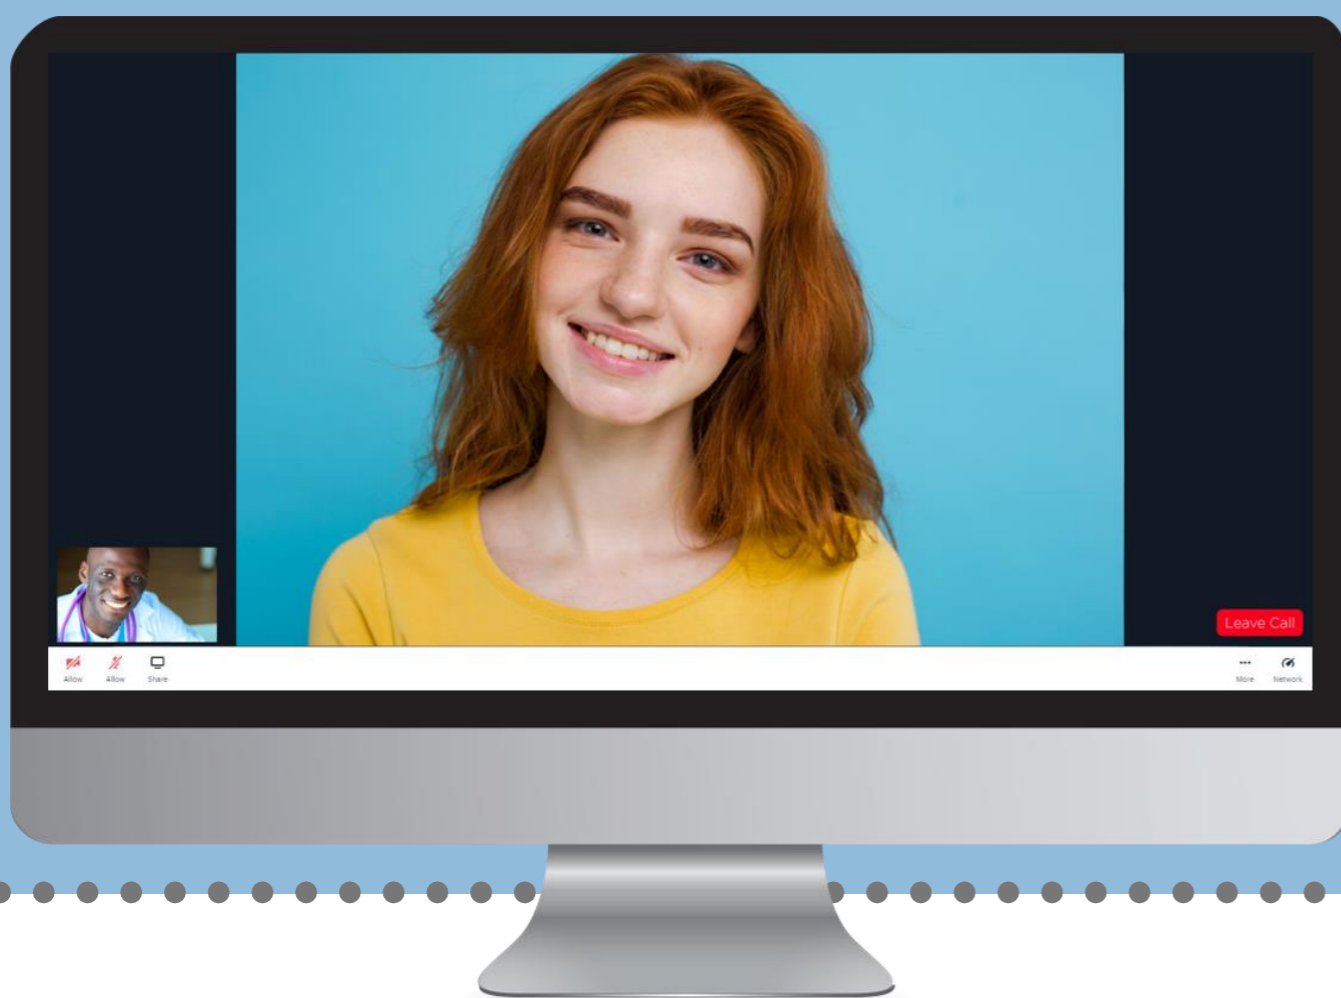

COVID-19: Diagnose patients remotely to protect patients and care providers alike

Routine Outpatient Visits: Connect with patients remotely with the benefit of keeping reimbursable care going and revenue flowing

Chronic Care Management: Keep your most at-risk patients safer and healthier by proactively connecting with them in the comfort of their home

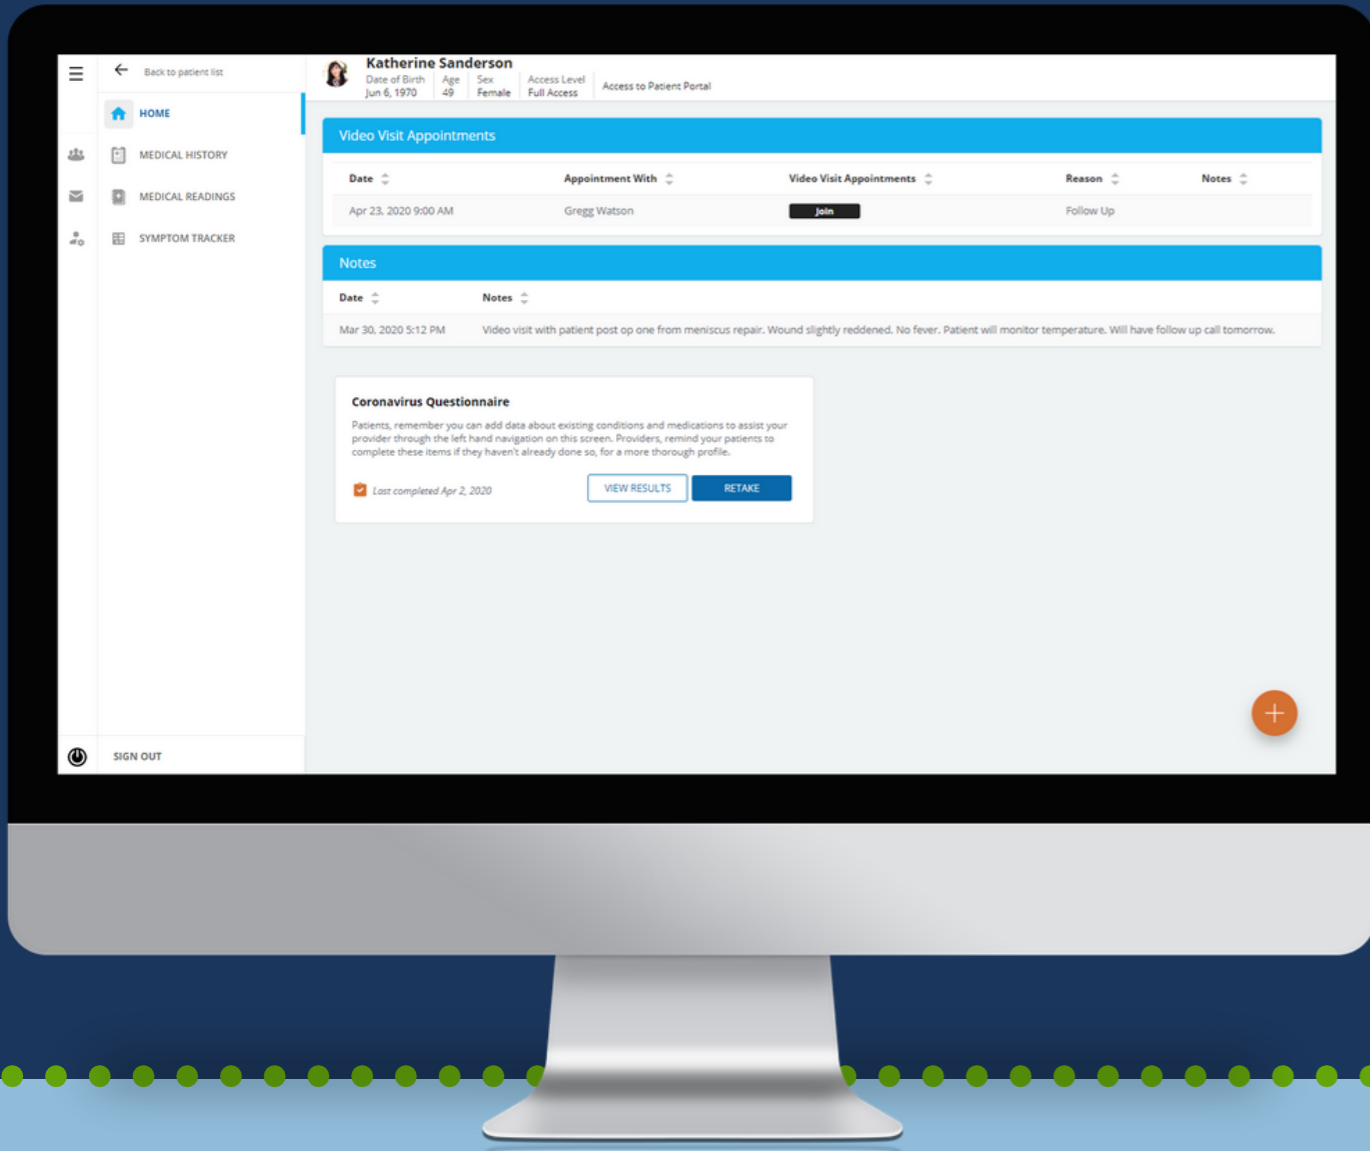

Product Benefits

- Designed for integration with MyCareCorner
- Fast implementation
- HIPAA-compliant
- Keeps Revenue Flowing
- Android or iPhone app available
- User-friendly

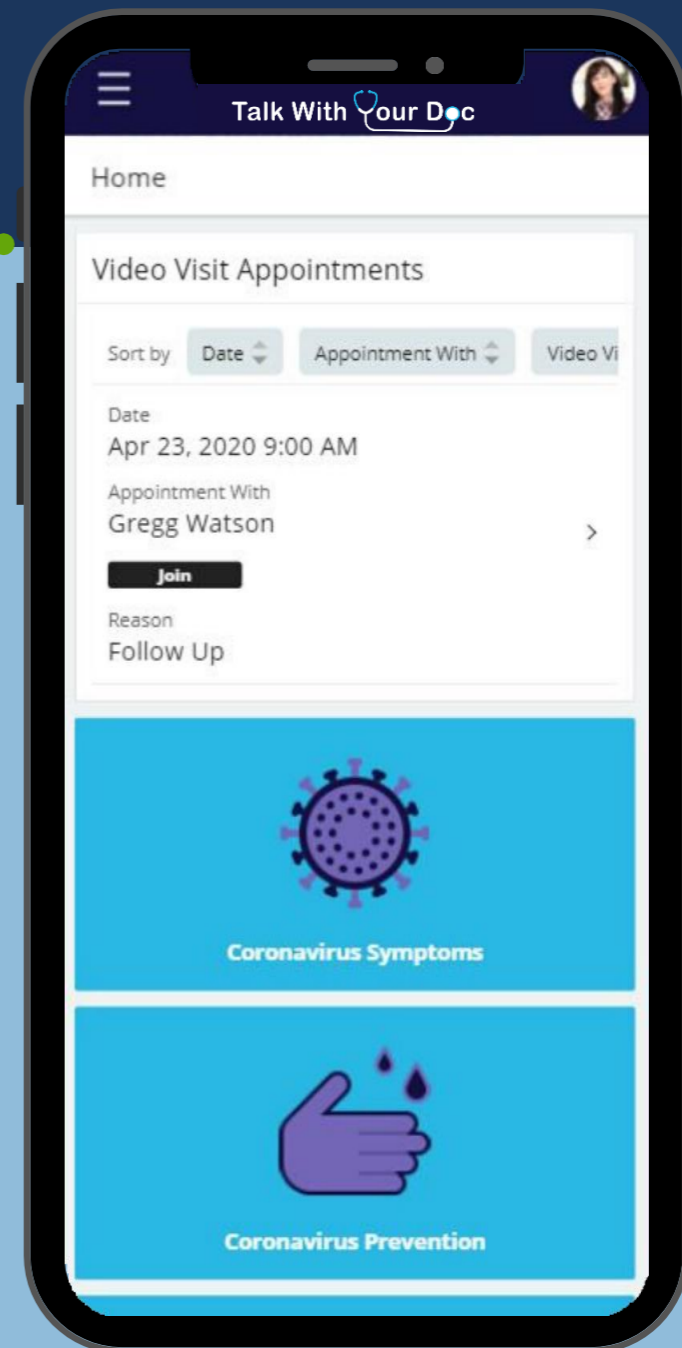

Provider

Talk With Your Doc eliminates the toughest hurdles healthcare providers face in implementing a telehealth solution. Providers can be up and running quickly without the need to install any software or requiring IT resources. With Talk With Your Doc, you can provide care from anywhere, at any time.

Patient

Talk With Your Doc is user-friendly for patients and providers alike. Provider/Patient interactions can begin very quickly with just a few minutes of training. Patients can easily access Talk With Your Doc on their desktop, tablet or mobile device.

If you've been considering adding telehealth for your community, the time is now.
